

### Hanging Bracket Instructions

Qty	Description
1	Hanging Bracket
2	Steel Support Plates
4	5/16" X 1 1/4" Bolts
8	5/16" Flat Washers
4	5/16" Lock Washers
4	5/16" Nuts

#### TF300 / Barrel Feeder Installation

Drill a 5/16" hole in the area labeled A. The center of the hole will be 3 1/4" from the top of the feeder and 11" from the side edge. Use the Steel Support as a pattern for the second hole. Repeat the process for the opposite side of the feeder.

Attach the bracket by placing a flat washer on the bolt and insert the bolt through the bracket, feeder wall and then the steel support inside hopper. Install flat washer, lock washer, and nut.
